Education

Ph.D. Biostatistics, 2014 - 2019
University of Minnesota, Minneapolis, MN
Thesis: Voxel-wise detection of prostate cancer using multi-parametric MRI data.
Advisors: *Joseph Koopmeiners*, *Lin Zhang*

B.S. Statistics, 2010 - 2014
School of the Gifted Young
University of Science and Technology of China, Hefei, Anhui, China

Research Interests

Statistical genetics and genomics
Multi-modal data integration
Disease risk prediction and precision medicine
Inter-organ research
Health inequity

Academic Appointments

Assistant Professor of Biostatistics (tenure-track), Feb. 2023 - Present
Faculty Member, Graduate Group in Epidemiology and Biostatistics
Faculty Member, Graduate Group in Applied Mathematics and Computational Science
Faculty Member, Penn Neurodegeneration Genomics Center
Senior Scholar, Center for Clinical Epidemiology and Biostatistics
Perelman School of Medicine, University of Pennsylvania

Postdoctoral Fellow, Sept. 2019 - Jan. 2023
Department of Biostatistics
Johns Hopkins Bloomberg School of Public Health
Mentor: *Nilanjan Chatterjee*

Research & Teaching Assistant, 2014 - 2018
Division of Biostatistics, School of Public Health
University of Minnesota

Professional Experience

Assistant Professor of Biostatistics, Feb. 2023 - Present

Department of Biostatistics, Epidemiology and Informatics, Perelman School of Medicine
University of Pennsylvania, Philadelphia, PA

Research Scientist Intern, May 2018 - Aug. 2018

Department of Biostatistics and Programming
Sanofi S.A., Cambridge, MA

Data Science Intern, May 2017 - Aug. 2017

Global Specialty Analytics
Liberty Mutual Insurance, Boston, MA

Honors and Awards

Awards & Scholarships

James R. Boen Student Achievement Award, University of Minnesota, 2019.

Doctoral Dissertation Fellowship, University of Minnesota, 2018.

COGS Grant Award, University of Minnesota, 2017.

Dean's PhD Scholar's Award, University of Minnesota, 2016.

John E. Connett First Year Award, University of Minnesota, 2015.

Outstanding Student Scholarship, University of Science and Technology of China, 2012, 2013 & 2014.

Competitions

Student Paper Award, Medical Device and Diagnostic Section, AMA Joint Statistical Meetings, 2017 & 2019.

1st place, Ph.D. Student Award, School of Public Health Research Day, University of Minnesota, 2017.

Silver Medal, China Girls' Mathematical Olympiad (CGMO), 2010.

Refereed Publications

Accounting for cancer subtypes heterogeneity identifies eight breast cancer risk loci.

Grant Support

Currently Funded Grants

1. NIH R00-HG012223, “Multi-ethnic risk prediction for complex human diseases integrating multi-source genetic and non-genetic information”, 02/01/2022 - 01/31/2026.

Name of PI: Jin Jin

Role: Principal Investigator

Project narrative: The proposed research aims to improve healthcare for the populations that are underrepresented in the public health fields. The research will generate novel methodologies and user-friendly tools to improve disease risk prediction for minority populations by integrating trans-ethnic, disparate sources of information on genetic markers, clinical and environmental factors, health conditions, and socio-demographic indicators.

2. NIH U01-CA164947, “Post Genome Wide Association Studies in Testicular Germ Cell Tumors”, 09/21/2020 - 08/31/2025.

Name of PI: Katherine Nathanson

Role: Co-Investigator

Project narrative: Testicular germ cell tumors (TGCT) are the most common tumor type in white men ages 15-45, with an increasing incidence. They have a high heritability and inherited variation underlies 50% of the risk of the disease. We build upon our prior research in the Testicular Cancer Consortium to identify additional genetic variation associated with disease risk, so that we expand our understanding of TGCT biology and epidemiology, as well as identify the men at highest risk of disease.

Presentations

Invited Talks

1. “Network-Informed Pathway-Wise Transcriptome-Wide Association Study”, ICSA Canada Chapter 2024 Symposium, June 2024.
2. “Methodological Advances and Applications of Polygenic Risk Score” (Virtual talk), Statistical Genetics seminar series, Boston University, April 2024.
3. “Gene Regulatory Network-Informed Identification of Differentially Expressed Gene Pathways and Disease Classification”, 20th Annual Meeting of MCBIOS, Atlanta, GA, Mar. 2024.
4. “Mendelian Randomization Analysis of Latent Exposures Co-regulating Multiple Correlated Traits”, ENAR Spring Meetings, Baltimore, MD, Mar. 2024.
5. “MUSSEL: Enhanced Bayesian Polygenic Risk Prediction Leveraging Information across Multiple Ancestry Groups” (Virtual talk), Statistical Genetics and Genomics Working Group, Columbia University, Dec. 2023.
6. “MUSSEL: Enhanced Bayesian Polygenic Risk Prediction Leveraging Information across Multiple Ancestry Groups” (Virtual talk), Statistical Genetics and Genomics Working Group, Columbia University, Dec. 2023.
7. “MUSSEL: Enhanced Bayesian Polygenic Risk Prediction Leveraging Information across Multiple Ancestry Groups” (Virtual talk), Polygenic RiSk MEthods in Diverse populations (PRIMED) Methods Development Sub-WG Meeting, Oct. 2023.
8. “Information Borrowing Approaches for Developing Equitable Polygenic Prediction Models across Diverse Ancestries” (Virtual talk), the 6th International Conference on Econometrics and Statistics (EcoSta 2023), Tokyo, Japan, Aug. 2023.
9. “Information Borrowing Approaches for Developing Equitable Polygenic Prediction Models across Diverse Ancestries” (Virtual talk), 2023 ISI World Statistics Congress, Ottawa, Canada, July 2023.
10. “ME-Bayes SL: Enhanced Bayesian Polygenic Risk Prediction Leveraging Information across Multiple Ancestry Groups”, ICSA 2023 China Conference, Chengdu, China, July 2023.
11. “ME-Bayes SL: Enhanced Bayesian Polygenic Risk Prediction Leveraging Information across Multiple Ancestry Groups”, 2023 WNAR/IMS annual meeting, Anchorage, Alaska, June 2023.
12. “Developing and Validating Prediction Models for Individual- and Community-level Risk for COVID-19 Mortality”, 2023 Lifetime Data Science (LiDS) conference, Raleigh, NC, June 2023.

13. “Genetic Propensity for Risky Behavior and Depression and Risk of Lifetime Suicide Attempt among Urban African Americans in Adolescence and Young Adulthood”. The 2023 Thomas R. Ten Have Symposium on Statistics in Mental Health, Boston, MA, May 2023.
14. “Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Department of Human Genetics, the University of Chicago, Chicago, IL, Feb. 2022.
15. “Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Department of Biostatistics and Bioinformatics, Milken School of Public Health, George Washington University, Virtual, Feb. 2022.
16. “Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Department of Biostatistics and Bioinformatics, School of Medicine, Duke University, Virtual, Feb. 2022.
17. “Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Department of Biostatistics, Epidemiology and Bioinformatics, Perelman School of Medicine, University of Pennsylvania, Virtual, Feb. 2022.
18. “Individual- and Community-Level Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Public Health Science Division, Fred Hutchinson Cancer Research Center, Virtual, Feb. 2022.
19. “Mendelian Randomization Analysis Using Multiple Biomarkers of an Underlying Common Exposure”, ICSA Applied Statistics Symposium, Sept. 2021.
20. “Estimating the Size of High-risk Populations for COVID-19 Mortality Across 442 US Cities”, Department of Biostatistics & Bioinformatics, School of Public Health, University of Colorado, Denver, June 2020.
21. “Voxel-wise Classification of Prostate Cancer Using Multi-parametric MRI Data”, 2020 Global Scientist Interdisciplinary Forum, Shenzhen, China, Jan. 2020.

Contributed Conference Presentations

1. “Mendelian Randomization Analysis of Latent Exposures Co-regulating Multiple Correlated Traits”. ENAR Spring Meetings, Baltimore, MD, Mar. 2024.
2. “Ancestry-specific Polygenic Risk Scores for Telomere Length in TOPMed.” Cohorts for Heart and Aging Research in Genomic Epidemiology (CHARGE) Meeting (Virtual), Oct. 2021.
3. “Mendelian Randomization Analysis for the Causal Effect of a Latent Exposure Underlying Multiple Related Traits.” American Society of Human Genetics Annual Meeting (Virtual), Oct. 2020.
4. “Bayesian Hierarchical Models for Voxel-Wise Classification of Prostate Cancer Accounting for Spatial Correlation and Between-Patient Heterogeneity in the Multi-Parametric MRI Data.” Joint Statistical Meetings, Denver, CO, July 2019.
5. “Bayesian Hierarchical Models for Voxel-wise Prostate Cancer Classification Using Nearest Neighbor Gaussian Process.” Joint Statistical Meetings, Vancouver, BC, Canada, July 2018.
6. “Detection of Prostate Cancer with Multi-parametric MRI Models Utilizing the Anatomic Structure of the Prostate.” Joint Statistical Meetings, Baltimore, MD, Aug. 2017.

7. “Multi-Parametric MRI Models for Prostate Cancer Diagnosis under a Bayesian Hierarchical Model Framework.” ENAR Spring Meetings, Washington, DC, Mar. 2017.

Teaching

Instructor (*at the University of Pennsylvania*)

BSTA 6210: Statistical Inference I, Spring 2024

Invited Lectures

Polygenic Risk Prediction: Algorithms, Fairness and Applications, BSTA 787 Guest Lecture, Department of Biostatistics, Epidemiology and Informatics, University of Pennsylvania, Feb. 2024

Linear and Logistic Regression, FDA Pharmacoeconomics Certificate Program Biostatistics Course, Dec. 2023

Polygenic Risk Prediction: Algorithms, Fairness and Applications, BSTA 7980 Guest Lecture, Department of Biostatistics, Epidemiology and Informatics, University of Pennsylvania, Sept. 2023

Teaching Assistant (*at the University of Minnesota*)

Bayesian Decision Theory and Data Analysis, Spring 2018

Advanced Statistical Inference, Spring 2017

Survival Analysis, Fall 2016 & Fall 2017

Biostatistics Modeling and Methods, Spring 2016

Fundamentals of Biostatistical Inference, Fall 2015

Biostatistics II, Spring 2015

Biostatistical Methods I, Fall 2014 & Spring 2015

Advising/Mentoring

(*at the University of Pennsylvania*)

PhD Advising

Dong Heon Lee, Ph.D. student in Biostatistics, 2023 - present

PhD Committees

Committee Member, Katrina Bazemore, Ph.D. student in Epidemiology, 2023 - present

Committee Chair, Zhuoping Zhou, Ph.D. student in Applied Mathematics and Computational Science (AMCS), 2024 - present

Master's Advising

Yihao Wang, MS student in Biostatistics, 2023 - present

Trainees/Research Assistants Supervised

Andrew Lakkis (BGS lab rotation), Ph.D. student in Biostatistics, 2023 Fall & 2024 Summer

Yue Yu, MS student in Biostatistics, 2023 - present

Ruofan Wang, MS student in Biostatistics, 2023 - present

Academic Advising

Chunyu Luo, MS student in Biostatistics, 2023 - present

Professional Activities

Memberships in Professional and Scientific Societies:

Member, American Statistical Association (ASA), 2017 - present

Member, International Biometrics Society - Eastern North American Region, 2017 - present

Member, International Biometrics Society - Western North American Region, 2020 - present

Member, American Society for Human Genetics (ASHG), 2020 - present

Member, International Chinese Statistical Association (ICSA), 2020 - present

Grant Reviewer, Patient-Centered Outcomes Research Institute (PCORI), 2024 - present

Service to Professional Societies:

Organizer, Invited Session on Recent Advances in High-dimensional Statistical Inference, 2024 ICSA China Conference, Wuhan, China, June 2024.

Reviewer, ASA Section on Statistics in Genomics and Genetics' Distinguished Student Paper Competition, 2024.

Organizer and Chair, Invited Session on Integrative Analysis of Multi-Modal Data with Applications in Risk Prediction, Neuroimaging, and Genomic Studies, 2023 WNAR/IMS annual meeting, Anchorage, AK, June 2023.

Moderator, Platform Session on Considering Ancestry in Study Populations, 2022 Annual Meeting of the American Society of Human Genetics (ASHG), Los Angeles, CA, Oct. 2022.

Organizer and Chair, Invited Session on Recent Advancements In Statistical Data Integration, 2022 ICSA Applied Statistics Symposium, Gainesville, FL, June 2022.

Contributed Session Chair, Section on Medical Devices & Diagnostics, Joint Statistical Meetings, Vancouver, BC, Canada, Aug. 2018.

Member, Biostatistics Qualify Exam Committee, 2024 - present

Member, Biostatistics Student Admissions Committee, 2023 - present

Member, GGEB Student Recruitment Committee, 2023 - present

Member, GGEB Awards Committee, 2023 - present

Member, Summer Undergraduate Internship Program (SUIP) committee, 2023 - present

Software

R Packages

MRLE

Mendelian randomization analysis for latent exposures leveraging information from multiple biomarkers.

T2DAG

A DAG-informed high-dimensional two-sample test for trait-associated gene pathways.

MUSSEL

An R-based command line tool for implementing MUSSEL, a powerful method for developing ancestry-specific polygenic risk score (PRS) that integrates information from GWAS summary statistics and external LD reference data from multiple populations (ancestry groups).

COVID-19 Risk Tools

Mortality Risk Calculator

The tool provides an assessment of individualized risks for mortality from COVID-19 using the best publicly available information on risks associated with various pre-existing conditions and socio-demographic factors. We further tailored it to produce absolute risk estimates in future time frames by incorporating information on pandemic dynamics at the community level with projections available from an ensemble of pandemic forecasting models.

Risk Interactive Maps

Developed through a collaborative effort with *PolicyMap*, the interactive maps show sizes of high-risk populations in the U.S., nationwide and by cities, countries, and states.
