Education

Ph.D. Biostatistics, 2014 - 2019
University of Minnesota, Minneapolis, MN
Thesis: Voxel-wise detection of prostate cancer using multi-parametric MRI data.
Advisors: *Joseph Koopmeiners*, *Lin Zhang*

M.S. Biostatistics, 2014 - 2016
University of Minnesota, Minneapolis, MN

B.S. Statistics, 2010 - 2014
School for the Gifted Young
University of Science and Technology of China, Hefei, Anhui, China

Research Interests

Bayesian modeling, statistical genetics and genomics, predictive modeling, Mendelian randomization.

Areas of applications:
Health inequity issues.
Statistical data integration.
Disease risk prediction and precision medicine.

Academic Appointments

Assistant Professor of Biostatistics (tenure-track), Feb. 2023 - Present
Department of Biostatistics, Epidemiology and Bioinformatics
University of Pennsylvania, Perelman School of Medicine

Postdoctoral Fellow, Sept. 2019 - Jan. 2023
Department of Biostatistics
Johns Hopkins Bloomberg School of Public Health
Mentor: *Nilanjan Chatterjee*

Research & Teaching Assistant, 2014 - 2018
Division of Biostatistics, School of Public Health
University of Minnesota

Professional Experience

Research Scientist Intern, May 2018 - Aug. 2018
Department of Biostatistics and Programming
Sanofi S.A., Cambridge, MA

Data Science Intern, May 2017 - Aug. 2017
Global Specialty Analytics
Liberty Mutual Insurance, Boston, MA

Honors and Awards

Awards & Scholarships

James R. Boen Student Achievement Award, University of Minnesota, 2019.
Doctoral Dissertation Fellowship, University of Minnesota, 2018.
COGS Grant Award, University of Minnesota, 2017.
Dean's PhD Scholar's Award, University of Minnesota, 2016.
John E. Connett First Year Award, University of Minnesota, 2015.
Outstanding Student Scholarship, University of Science and Technology of China, 2012, 2013 & 2014.

Competitions

Student Paper Award, Medical Device and Diagnostic Section, AMA Joint Statistical Meetings, 2017 & 2019.
1st place, Ph.D. Student Award, School of Public Health Research Day, University of Minnesota, 2017.
Silver Medal, China Girls' Mathematical Olympiad (CGMO), 2010.

Refereed Publications

*Authors contributed equally to the manuscript

Grant Support

Currently Funded Grant

1. NIH K99-HG012223, “Multi-ethnic risk prediction for complex human diseases integrating multi-source genetic and non-genetic information”. Role: **Principal Investigator**. 100% salary support, 02/01/2022 - 01/31/2023.
Project narrative: The proposed research aims to improve healthcare for the populations that are underrepresented in the public health fields. The research will generate novel methodologies and user-friendly tools to improve disease risk prediction for the minority

populations by integrating trans-ethnic, disparate sources of information on the genetic markers, clinical and environmental factors, health conditions, and socio-demographic indicators.

Presentations

Invited Talks

1. “Individual- and Community-Level Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Public Health Science Division, Fred Hutchinson Cancer Research Center, Virtual, Feb. 2022.
2. “Individual- and Community-Level Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Center for Biostatistics, College of Medicine, Ohio State University, Virtual, Feb. 2022.
3. “Individual- and Community-Level Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Department of Statistics, North Carolina State University, Virtual, Jan. 2022.
4. “Individual- and Community-Level Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, Department of Biostatistics, NYU School of Global Public Health, Virtual, Jan. 2022.
5. “Individual- and Community-Level Disease Risk Prediction through the Integration of Information across Disparate Data Sources”, NYU Langone Health, Virtual, Dec. 2021.
6. “Mendelian Randomization Analysis Using Multiple Biomarkers of an Underlying Common Exposure”, ICSA Applied Statistics Symposium, Sept. 2021.
7. “Estimating the Size of High-risk Populations for COVID-19 Mortality Across 442 US Cities”, Department of Biostatistics & Bioinformatics, School of Public Health, University of Colorado, Denver, June 2020.
8. “Voxel-wise Classification of Prostate Cancer Using Multi-parametric MRI Data”, 2020 Global Scientist Interdisciplinary Forum, Shenzhen, China, Jan. 2020.

Contributed Conference Presentations

1. “Ancestry-specific Polygenic Risk Scores for Telomere Length in TOPMed.” Cohorts for Heart and Aging Research in Genomic Epidemiology (CHARGE) Meeting (Virtual), Oct. 2021.
2. “Mendelian Randomization Analysis for the Causal Effect of a Latent Exposure Underlying Multiple Related Traits.” American Society of Human Genetics Annual Meeting (Virtual), Oct. 2020.
3. “Bayesian Hierarchical Models for Voxel-Wise Classification of Prostate Cancer Accounting for Spatial Correlation and Between-Patient Heterogeneity in the Multi-Parametric MRI Data.” Joint Statistical Meetings, Denver, CO, July 2019.
4. “Bayesian Hierarchical Models for Voxel-wise Prostate Cancer Classification Using Nearest Neighbor Gaussian Process.” Joint Statistical Meetings, Vancouver, BC, Canada, July 2018.
5. “Detection of Prostate Cancer with Multi-parametric MRI Models Utilizing the Anatomic Structure of the Prostate.” Joint Statistical Meetings, Baltimore, MD, Aug. 2017.

6. “Multi-Parametric MRI Models for Prostate Cancer Diagnosis under a Bayesian Hierarchical Model Framework.” ENAR Spring Meetings, Washington, DC, Mar. 2017.

Teaching Experience

Teaching Assistant (*at the University of Minnesota*)

Bayesian Decision Theory and Data Analysis

- Spring 2018

Advanced Statistical Inference

- Spring 2017

Survival Analysis

- Fall 2016 & Fall 2017

Biostatistics Modeling and Methods

- Spring 2016

Fundamentals of Biostatistical Inference

- Fall 2015

Biostatistics II

- Spring 2015

Biostatistical Methods I

- Fall 2014 & Spring 2015

Mentoring Experience

co-advised with Dr. Nilanjan Chatterjee at Johns Hopkins University

Yuqi Zhang, B.S., Department of Biomedical Engineering, JHU, June 2020 - Present.

- Projection models for the risk of mortality due to COVID-19.
- Polygenic risk prediction of posttraumatic Stress Disorder (PTSD) related traits.

Professional Activities

Memberships

American Statistical Association (ASA)

International Biometrics Society - Eastern North American Region (ENAR)

American Society for Human Genetics (ASHG)

International Chinese Statistical Association (ICSA)

Services

Invited Session Organizer and Chair, Recent Advancements In Statistical Data Integration, 2022 ICSA Applied Statistics Symposium, June 2022.

Contributed Session Chair, Section on Medical Devices & Diagnostics, Joint Statistical Meetings, Vancouver, BC, Canada, Aug. 2018.

Programming Skills

Programming Languages: R, MATLAB, Python.

Software

R Packages

[MRLE](#)

Mendelian randomization analysis for latent exposures leveraging information from multiple biomarkers.

[T2DAG](#)

A DAG-informed high-dimensional two-sample test for trait-associated gene pathways.

[MEBayesSL](#)

An R-based command line tool for implementing ME-Bayes SL, a powerful method for developing ancestry-specific polygenic risk score (PRS) that integrates information from GWAS summary statistics and external LD reference data from multiple populations (ancestry groups).

COVID-19 Risk Tools

[Mortality Risk Calculator](#)

The tool provides an assessment of individualized risks for mortality from COVID-19 using the best publicly available information on risks associated with various pre-existing conditions and socio-demographic factors. We further tailored it to produce absolute risk estimates in future time frames by incorporating information on pandemic dynamics at the community level with projections available from an ensemble of pandemic forecasting models.

[Risk Interactive Maps](#)

Developed through a collaborative effort with *PolicyMap*, the interactive maps show sizes of high-risk populations in the U.S., nationwide and by cities, countries, and states.
